Dallas, Tx

Work Experience

Cerner / Kansas City, Mo

Software Engineer

September 18 to July 19

- Utilizing Java, JavaScript, Maven, and SQL in order to develop Java RESTful web services .
- The primary focus of this project was to implement EHR (Electronic Health Record) interoperability.
- Addition and creation of new endpoints, unit/integration tests (JUnit/JBehave), as well as general debugging for failing builds or dependency convergence.
- Voluntarily took on the project of fixing errors reported by HP Fortify static analysis. This was a required standard for the DoD and VA projects such as: EHR interoperability.

Cerner / Kansas City, Mo

Software Intern

May 17 to September 17

- Utilizing React, Ruby on Rails, Postgres, and HTML/CSS
- Made additions and fixes to the Project Selector application. (React/Rails)
- New graduates entering the Developers Academy use Project Selector to rank their protentional projects for the training process.
- I found this to be a great opportunity for any undergrad to see how a development team operates on a weekly basis such as: scrum, and communication during technical syncs.

Educational Background

Computer Science, Bachelors

August 14 to August 18

University of Arkansas, Fayetteville, AR

GPA: 3.4

Skills Summary

Languages: C++, Java, JavaScript, Ruby on Rails, React, SQL, HTML/CSS

Tools: Node.js, Maven, Git, Crucible, Jira, Jenkins, Oracle Database, Tomcat/Docker

Process: Agile/Scrum, Waterfall

Leadership

- Volunteer for Wish KC (Make a Wish)
- Senior Class President
- Rush Chairman (Phi Gamma Delta)
